

Sharp UP3515 Touchscreen Terminal

- **Stable and Robust** – using the Sharp embedded POS technology
- **Rich Functionality**
- **Easy to use with touch screen**
- **Scalable & Expandable** – use as a stand alone machine or as part of a network of machines
- **Compact and stylish design**
- **Peace of mind** - SD card slot for data back-up
- **Management Control** - Flash reporting and comprehensive report capability
- **Improve Information** - PLU information text for product information, recipes or wine-tasting notes
- **Connects to peripherals such as scanners**

The UP-3515 EPOS terminal is built on more than 20 years of Sharp EPOS expertise, offering a stylish and compact design, and a wealth of advanced but easy to use functions, so it's suitable for a wide variety of hospitality and retail environments.

The UP-3515 has a 15" high-resolution LCD colour touch screen, meaning it's easier and clearer to use for those working at a fast pace. The comprehensive list of functions includes the ability to split bills for large groups wanting to pay separately, and promotions menus that are usually associated with much higher price EPOS terminals. The UP-3515 also offers instant power on, and data is securely saved to the electronically protected memory giving peace of mind as no data will be lost.

The flexibility of the UP-3515 means it can be used as a single machine or as part of a network thanks to standard Ethernet technology. Peripherals such as barcode scanners, weighing scales, smartcard readers can also be connected with the minimum of fuss. The compact size and tilting screen of the UP-3515 means that it fits into the most space challenged environments.

Utilising the strengths of the Sharp embedded POS range, the UP3515 incorporates intelligent new improved features such as auto-key functionality to save time, full table monitoring, transaction recall, and a useful customer file for customer tracking.

Full Specifications

Main Features

- LCD Size: 15", Backlit TFT screen
- Resolution: 1024 x 768
- Fanless: Yes
- Drawer Ports: 2
- RS232 Ports: 5 (1 of which is powered: 5V)
- Ethernet LAN: TCP/IP; 10 Base-T/100 Base-T
- Memory Card: SD Card
- Clerk keys: Contactless Clerk Key Body included (optional keys UP-R10CL2)
- Scanning: Yes
- Scale Link: Yes
- Tax Rates: 6
- Currency Conversion: 9 Rates
- Number of Customers: 1,000–8,000 (depends on level of detail)
- Time and Attendance Control: Yes (time-in; time-out; break start; break end)
- Number of Departments: 20–99
- Number of PLUs: 12,000 (standard) – 65,000 (using RAM expansion board)
- Number of Clerks: 255 max
- Number of GLUs: 50 (standard) – 500 (using RAM expansion board)
- Max Number of Keys on Screen: 132
- Max Number of Screens: 31 (30 screens plus 1 bill separation screen)
